

AUDIBEL® ™

Wireless hearing
solutions fit for life.

AUDIBEL®

Fit for life.

It's been proven that hearing health is directly connected to overall health and well-being.

When you're able to hear and engage with the world around you, you live a better and healthier life.

Our pursuit to help people hear better and live better has led to our biggest breakthrough to date.

Audibel's most advanced technology, **A4™** offers supreme sound quality and premium features. A4 is customized to fit your unique hearing needs and enhance your listening experiences.

A4 hearing aids are made for life.

AUDIBEL® **A4™**

Made for your day-to-day.

Listening in noise

Advanced noise reduction technology and precise directional microphones work together to help make speech easier to hear in today's complex listening environments.

Better connections

Stream TV, music and more to your hearing aids. SurfLink® Mobile 2, SurfLink Media 2 and SurfLink Remote offer carefree hands-free connectivity and control with no worn device.

Works with your phone

While other hearing aid manufacturers require you to wear a device around your neck, SurfLink accessories offer a direct wireless connection between your phone – or any other Bluetooth® device – and your hearing aids.

SURFLINK®

Our Audibel wireless hearing aids wouldn't be complete without our popular SurfLink accessories.

Made for convenient connectivity.

With more and more wireless products on the market, making connections between devices can be challenging. To navigate listening environments with high wireless traffic, our 900sync™ technology provides a powerful solution. It delivers high bit-rate streaming, allowing for ear-to-ear phone streaming and wireless capabilities for single-sided hearing loss.

Our compact cell phone transmitter, **SurfLink Mobile 2**, is an assistive listening device, media streamer and hearing aid remote all rolled into one.

SurfLink Mini Mobile works in tandem with SurfLink Remote Microphone 2 to offer you a small and simple cell phone streaming solution.

SurfLink Media 2 is a set-and-forget media streaming solution that connects to TVs, MP3 players and more, to wirelessly stream audio directly to your hearing aids.

Our **SurfLink Remote** can be used to adjust volume, change memory modes, go in and out of streaming mode and much more — all with the push of a button.

Our discreet, lightweight **SurfLink Remote Microphone 2** is worn by a conversation partner to aid patients in one-on-one conversations in difficult listening environments.

Fit for music lovers

*“Life seems to go
on without effort
when I am filled
with music.”*

- GEORGE ELIOT

*Tastes in music may be unique,
but the power of music is
universally understood.*

Thanks to the processing power in A4i iQ hearing aids, you can enjoy your favourite music in a whole new way with features that:

- Focus on music audibility, desired loudness and sound quality
- Make soft music sounds audible
- Allow on-demand and automatic control

The result is listening enjoyment for the way you want to hear music — automatically and in your control.

Made for every type of hearing loss.

There are approximately 60,000 new cases of single-sided hearing loss in the U.S. each year.¹

If you have single-sided hearing loss, A4 has a solution for your hearing needs.

Our wireless **CROS** and **BiCROS** hearing aids bring audibility and speech understanding to those who struggle with single-sided hearing loss. 900sync Technology allows streaming to the good ear to provide quality, clarity and consistency of sound.

CROS/BiCROS functionality is available to you in RIC or BTE styles.

Made to deliver the very best.

YOU WANT:

To hear comfortably in
challenging environments

Better wireless streaming

A comfortable, personalized
listening experience

No buzzing or whistling

Durable, dependable
hearing aids

Music the way it was
meant to be heard

Customizable tinnitus relief

AUDIBEL A4 DELIVERS:

Acuity™ Directionality, designed to improve speech audibility in difficult listening situations along with **Speech Shift**.

Technology that provides consistent wireless performance while streaming cell phone, TV, music and other media with **SurfLink Mobile 2**, **SurfLink Mini Mobile** and other **SurfLink** accessories.

Capabilities that speed your transition to hearing aids with gradual adjustments, distortion-free listening in noise, and ultimate clarity for soft sounds.

Audibel's best-in-class feedback cancellation system providing feedback-free, comfortable listening all day long.

Surface™ NanoShield, our pioneering water, wax and moisture repellant system, to protect and ensure durability and dependability.

A design that allows you to experience music in a whole new way. Now you can hear every note the way the artist intended – with pure, refined sound quality.

Advanced **Multiflex Tinnitus Technology** integrated into A4 to bring relief to those who suffer from ringing in the ears.

Listening environments

Made for everywhere you are.

From the beginning, our hearing solutions have enabled people to hear better in challenging environments and live a better life.

You want to hear all the subtleties of life: the inflection in the voice of a spouse or the nuances in the notes of a favorite song. Whether it's one-on-one or in the most crowded places, you'll hear the world around you.

What you need will depend on how busy and active you are, and what types of environments you frequent.

What is your hearing lifestyle?

Our lineup of products enhances many different listening environments. What you need depends on your lifestyle and how active you are.

Compare the listening environments on the chart inside.

Styles and colors

AUDIBEL® ™

Pick your favorite color among our new styles, which include our smallest devices and custom-fit options – both with tinnitus and wireless CROS and BiCROS solutions.

Consult your hearing care professional to see which hearing aids are right for you.

Made so the world may hear

*Our Founder and CEO,
William F. Austin, has
always held a strong
belief that the gift of
better hearing results
in a fuller and richer life.*

We prove our dedication to this philosophy daily, through our support of Starkey Hearing Foundation.

The gift of hearing opens up new worlds of opportunity. It connects individuals to life and helps them realize they can accomplish more than they ever thought possible. Starkey Hearing Foundation uses hearing as a vehicle to change lives around the world.

Made to help millions.

SERVED

COUNTLESS
LIVES CHANGED

Spread hope from ear to ear. To learn more or give the gift of hearing, visit StarkeyHearingFoundation.org.

Made for a happy, healthy life.

Hearing loss isn't just an ear issue, it's a quality of life and health issue.

It can occur for natural reasons, but other causes might surprise you.

Older adults*

with impaired hearing may have a **shorter lifespan** than their peers without hearing problems.¹

*70 years and older

People* with a hearing loss experience a **30-40% faster decline in cognitive abilities** compared to peers without hearing loss.²

*75 years and older

People with **low-frequency hearing loss** are considered **at risk** for cardiovascular events.³

A4 hearing aids are made so people with hearing loss won't have to miss a single sound that brings them joy. They are made knowing better hearing leads to better living.

Adults* with untreated hearing loss

were more likely to report depression, anxiety and paranoia than peers who wore hearing aids.⁴

*50 years and older

Adults with untreated hearing loss are more likely to develop dementia.⁶

There is a significant association between **high blood pressure** and untreated hearing loss.⁷

People with mild hearing loss are **3x more likely** to have a history of falling.⁸

90-95%

of people with hearing loss can be treated with hearing aids.⁹

Simply put, A4 hearing aids are made for life.
